EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Robert W. Faris on 8/19/04.

The application has been amended as follows:

Page 1, line 1, inserted ---FIELD OF THE INVENTION---, line 13, inserted ---BACKGROUND OF THE INVENTION---, line 27, inserted ---SUMMARY---.

Page 7, line 4, inserted ---DETAIL DESCRIPTION OF THE DRAWINGS---.

At claim 6, line 1, deleted "one of Claims" and inserted ---one of Claims 1.---.

Remarks

2. The changes above have been provided to improve the clarification of the claims and specification.

Allowable Subject Matter

3. Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach that, the electrical connection between the component and the antenna elements is made via an interface, such that at least two inner conductor sections and/or two outer conductor sections are coupled or can be

coupled without any contact, an antenna-side connecting section and a connecting section, which interacts with it and is part of the component which can be connected, are provided, and the components which can be connected to the antenna for RF purposes can be connected by pushing in pushing out the at least one associated connecting section into or out of the correspondingly designed antenna-side connecting section in combination with all limitations recited in independent claim 1.

The prior art does not teach that, the electrical connection between the component and the antenna elements is made via an interface, such that at least two inner conductor sections and/or two outer conductor sections are coupled or can be coupled without any contact, an antenna-side connecting section and a connecting section, which interacts with it and is part of the component which can be connected, are provided, the two connecting sections can be positioned with respect to one another via a holding device in an axial and/or radial relative position which can be predetermined in combination with all limitations recited in independent claim 4.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Eckert et al (US 6,276,199) and Mikkola et al. (US 6,529,7168) are cited to show an antenna device.
